

Synthetic Roof Underlay - Whitecap

DESCRIPTION: Fastwrap Whitecap is a synthetic underlay for use under roof and wall claddings. It reduces drafts and assists in moisture management. It is suitable for use in both commercial and residential applications. Consists of a micro-porous water resistant film, laminated between two layers of non woven spun-bonded polyolefin.

KEY FEATURES & BENEFITS:

- Suitable for both residential and commercial use.
- Can be used on roofs and walls.
- Suitable for use with timber and steel framing.
- AS 1530.2 Flammability index of 1.
- Significantly higher moisture absorption rating than other products currently available in New Zealand (Fastwrap Whitecap surface absorbency 241g/m². Average industry product 150g/m²).
- Absorption is compliant with Standard NZS 2295: 2006.
- Strong light diffusion properties maximise ambient light and reduce the requirement for artificial light.
- Strong and durable. Does not tear when pierced.
- UV treated to 2.5%.
- Meets NZ Building Code (NZBC) clause B2 durability performance B2.31 (b) not less than 15 years.
- May be used unsupported up to 900mm centres.
- Should not be used under skylights.

SIZE RANGE AVAILABLE:

1300mm wide x L 58m = 75m²

1800mm wide x L 56m = 100m²
