Surface finish selection

Choosing the colour and surface finish for your windows and doors is a crucial part of the design process for your home. It is important that you choose the right product for the right application to ensure the life of your surface finish, and in some cases that your windows and doors are covered under their warranty.

Which product option is right for you?

Duralloy® is designed for:

- Residential developments
- Buildings up to three levels above ground
- Properties greater than 100 metres from high tide level.

Offers a 10 year film and colour integrity warranty.

Duratec® is designed for:

- High end residential and commercial developments
- Major architectural developments
- Properties greater than 10 metres from high tide level.

Offers a 20 year durability warranty for film integrity (colour integrity warranty will be less in duration and colour dependent).

Consult with your local manufacturer for further advice on Duratec® powdercoat finishes.

Which colour is right for you?

Our range of 35 popular colours is a good place to start. All 35 colours are supplied in Duralloy®, the most economical powdercoat finish. Some of these colours are also available in Duratec®, a high performance powdercoat finish. Duratec® colours carry a small price premium.

Choosing the right powdercoat finish for you

Step 1 Choose the right product

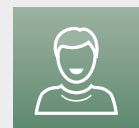

Consider your environment and site conditions, especially if your home is coastal. Your site location will determine the performance requirements of your surface finish.

Step 2 Choose the right colour

There are a number of options to choose from. A good place to start is our popular colour range of 35 colours.

If you want a colour that is not in the popular range, consult with your manufacturer. Please note that these colours will carry a price premium.

Step 3 Choose the right manufacturer

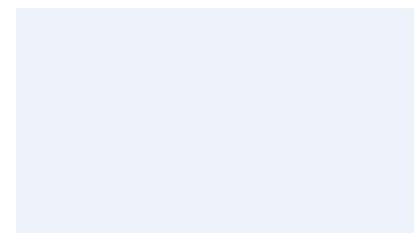

Consult with your local manufacturer for further advice and to request a colour swatch.

A word to the wise: when you are making your final colour selection, assess an aluminium colour swatch in natural light.

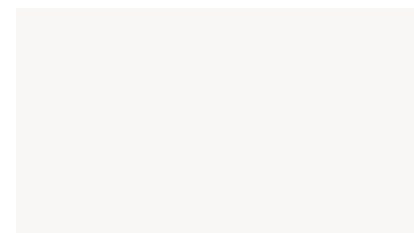

Popular Colour Range

Colour selection tips

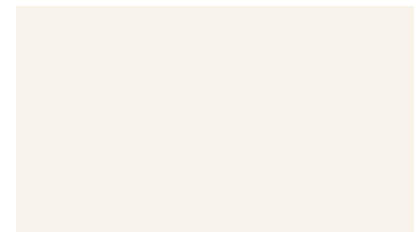

- When you make your final colour selection, use an aluminium colour swatch and assess it in natural light
- When judging colour consistency and integrity of the finished product, the accepted industry standard is inspection from a distance of two metres
- Consider the environmental and site conditions of your property and ensure that the powdercoat product you choose is fit for purpose.
